

COLERNE VILLAGE HALL ASSOCIATION

REGISTERED CHARITY 1072699

ENERGY AND ENVIRONMENTAL CONSERVATION POLICY

There continues to be concern over the environment, the impact of energy efficiency, the implications of landfill and general conservation.

As the Hall has no recycling facility all users of the Hall are requested to take their recycling material home and recycle it in the appropriate way.

As rubbish collection is fortnightly all users of the Hall are requested to take all Rubbish generated home and dispose of it in the appropriate way.

All lights must be turned off when leaving the Hall.

All heaters, in the Main Hall must be set to 5 Degrees when leaving the Hall using the thermostat above each heater.

In order to reduce heat loss and maintain electricity consumption the emergency doors must only be used for essential deliveries and removal and must in no circumstances be used for public access or departure.
